In accordance with this publication, all employees adhere to our core values of **“Inquisitiveness, Integrity, Client focus, and Teamwork”**, and constantly strive to implement our management philosophy of **“Stable Operation, Continual Innovation, Performance-driven Culture and Business Synergies”** so as to achieve our corporate mission of **“Rewarding Our Country with Value-created Finance”**.

During the Reporting Period, the Company successfully issued H Shares which were then listed on the Hong Kong Stock Exchange, making a significant impact on the international market. Meanwhile, the Company oversaw the launch of “six major strategies”, achieving strong results. Maintaining an efficient approach towards risk management, the Company will continue to capture innovative development trends of the industry and devise a comprehensive strategy for internet finance, promote Internet-based services, as well as increase efforts to progress and evolve, expand its business scope, procure collaborative and efficient developments and breakthroughs in key aspects and provide a one-stop and all-round comprehensive financial service for clients.

The Company has achieved strong operating results, significant strategic development and constant innovation during the Reporting Period. Our major operating indicators are industry-leading, and we have succeeded in creating excellent economic benefits for our shareholders.

II. ANALYSIS ON PRINCIPAL BUSINESS

(1) Overview

During the Reporting Period, the economic development in both domestic and international markets experienced negative trends attributable to a number of factors. The domestic economy continued to undergo further economic reforms designed to achieve stable growth, structural reform and greater development. The overall national economy experienced a slowdown but was stable, with industrial infrastructure continuing to be optimized, with a number of new, Internet-based industries emerging. In the first half of 2015, year-on-year growth of GDP was 7%, while that for the tertiary industry was 8.4% and real growth of per capita disposable income in China was 7.6% (Source: National Bureau of Statistics, 2015).

In the first half of 2015, the A Share market experienced significant volatility from a sharp increase in share prices to a sharp slump due to “de-leveraging activities”. Stock trading volume increased significantly during the first half of 2015. As of June 30, 2015, the SSE Composite Index and SZSE Component Index had risen 32.23% and 30.17%, respectively, with reference to the figures as at the end of 2014. During the Reporting Period, the trading volume of A Shares was RMB138,394,543 million, representing a year-on-year increase of 543.39%; the margin financing and securities lending business maintained explosive increase in 2014. As of June 30, 2015, the balance of margin financing and securities lending on the Shenzhen stock market and the Shanghai stock market was RMB2,049,386 million, an increase of 99.81% as compared with figures as at the end of 2014. Meanwhile, IPO issuance has accelerated remarkably with the volume of equity finance increasing 131.99% year-on-year to RMB554,516 million. The volume of enterprise bond financing was RMB181,062 million, representing a year-on-year decrease of 59.28%; the volume of corporate bond financing was RMB715,313 million, representing a year-on-year increase of 600.03% (Source: WIND, statistics of the Company, 2015).

As of June 30, 2015, the total assets of the Group amounted to RMB517,126 million, a year-on-year increase of 115.38%; the equity attributable to owners of the Company was RMB72,587 million, a year-on-year increase of 83.25%. During the Reporting Period, total revenue and other income of the Group was RMB23,993 million, a year-on-year increase of 324.20%; total expenses were RMB12,827 million, a year-on-year increase of 242.30%; operating profit was RMB11,166 million, a year-on-year increase of 484.91%; net profit attributable to owners of the company was RMB8,406 million, a year-on-year increase of 401.85%.

(2) Analysis on Principal Operating Revenue

The Company is positioned as a provider of comprehensive capital market services with industry-leading innovation capabilities focused on serving China's quality SMEs and affluent individuals. The Company has built a diversified business serving the varying needs of corporations (especially SMEs), individuals (especially affluent individuals), institutional investors, financial institutions and government clients. The main business of the Company has been classified into four segments, namely investment banking, wealth management, trading and institutional client services and investment management, with their respective products and services set forth in the following table:

Investment Banking	Wealth Management	Trading and Institutional Client Services	Investment Management
◆ Equity finance	◆ Retail brokerage and wealth management	◆ Equity sales and trading	◆ Asset management
◆ Debt finance	◆ Margin financing and securities lending	◆ Fixed income sales and trading	◆ Fund management
◆ Financial advisory	◆ Repurchase transactions	◆ OTC sales and trading	◆ Private equity investment
		◆ Investment research	◆ Alternative investments
		◆ Asset custody	

During the Reporting Period, the Group's total revenue and other income grew by 324.20% year-on-year to RMB23,993 million, including RMB787 million from investment banking representing a year-on-year increase of 2.84%, RMB13,559 million from wealth management representing a year-on-year increase of 367.38%, RMB6,002 million from trading and institutional client services representing a year-on-year increase of 304.44% and RMB2,705 million from investment management representing a year-on-year increase of 687.97%.

1. Investment banking business

The Group's investment banking business mainly covers equity finance, debt finance and financial advisory services. During the Reporting Period, the total revenue and other income of the investment banking business was RMB787 million representing a year-on-year increase of 2.84%.

(1) Equity finance business

The volume of stocks issued and underwritten through IPO or refinancing of listed companies during the Reporting Period increased significantly. A total of 409 equity finance projects were launched in the A Share market during the Reporting Period, a year-on-year growth of 110.82% (among them, 192 were IPO projects, representing a year-on-year increase of 236.84%; 217 were refinancing projects, representing a year-on-year increase of 58.39%); the size of the projects underwritten reached RMB554,516 million, representing a year-on-year growth of 131.99% (of which, the size of IPO projects was RMB147.382 billion, representing a year-on-year increase of 277.64%; the size of refinancing projects was RMB407.134 billion, representing a year-on-year increase of 103.57%) (Source: WIND, 2015).

Following the continuous implementation of our business strategy of 2014 in relation to the investment banking business, the Company has actively promoted IPO projects and increased the expansion of refinancing business of listed companies. During the Reporting Period, the Company completed 25 equity finance projects, with the value of projects in which the Company acted as a lead underwriter reaching RMB10,559 million. The Company ranked third and second in the industry in terms of equity finance and IPO projects in which the Company acted as a lead underwriter respectively (Source: WIND, 2015). The amount of commission and fees generated as a result of the Company's equity underwriting and sponsorship during the Reporting Period was RMB498 million, representing a year-on-year increase of 32.33%.

The Company's equity underwriting business during the Reporting Period is as shown below:

Item	From January to June 2015		From January to June 2014	
	Amount of projects where the Company acted as a lead underwriter (RMB 100 million)	Number of issuance	Amount of projects where the Company acted as a lead underwriter (RMB 100 million)	Number of issuance

Refinancing offering	67.03	13	100.23	7
Total	105.59	25	120.61	11

(2) Debt finance business

During the Reporting Period, the enterprise bond financing was RMB181,062 million, a year-on-year decrease of 59.28%, and the corporate bond financing was RMB715,313 million, a year-on-year increase of 600.03%. Affected by the Opinions of the State Council on Strengthening the Administration of Local Government Debts (Guo Fa [2014] No. 43), both the number and the size of enterprise bond offering have declined markedly. Although the Company responded quickly to increase the expansion of corporate bond business, the Company's bond underwriting business declined due to the cyclicity of business structure adjustment. During the Reporting Period, the Company issued 18 bonds of various types for our clients accumulatively in the capacity of lead underwriter, with a total underwritten amount of RMB21,027 million (Source: WIND, 2015). The Company earned RMB104 million of commission and fee income from bond underwriting and sponsorship business, representing a year-on year decrease of 50.79%.

The Company's bond underwriting business during the Reporting Period is as shown below:

Item	<u>From January to June 2015</u>		<u>From January to June 2014</u>

(3) Financial advisory business

The Company's financial advisory business mainly covered income from providing financial advisory services for the M&A and restructuring of listed companies, and financial advisory for companies listed on the NEEQ. The Company achieved an income from financial advisory commission and fee of RMB167 million during the Reporting Period, representing a year-on-year growth of 173.10%.

With the approaching of the registration-based IPO system, the completion of *the Revision to Administrative Measures for the Material Asset Reorganizations of Listed Companies* and supporting rules, and the constant growth of A shares in the second half of 2014, listed companies are increasingly eager to optimize industrial layout through M&A and reorganization, consolidate their leading position and increase their market value. The fiery state of 2014 extended to the first half of 2015. In the favorable environment with the benefit of reform accompanied by the demand for industry transformation of listed companies, and the orientation of policies for M&A and reorganization, listed companies are very active in M&A and reorganization. During the Reporting Period, the China Securities Regulatory Commission approved a total of 133 material asset reorganizations. The Company has provided financial advisory services for seven projects of material asset reorganization, ranking third in the industry. The financial advisory commission and fee of M&A business of the Company was RMB99 million, representing a year-on-year growth of 653.06%.

The year 2015 is the second year after NEEQ expanded nationwide with a greatly increased number of listed companies. As of June 30, 2015, there were 1,065 new companies listed on the NEEQ as compared with that at the end of 2014, with an aggregate number of listed companies of 2,637 (Source: the NEEQ's website, 2015). During the Reporting Period, the Company acted as the sponsor broker of 34 new companies listed in NEEQ. As of June 30, 2015, the Company has recommended 107 enterprises to be listed on NEEQ accumulatively, ranking third place of the industry (Source: statistics of the Company, 2015). In the first half of 2015, the income from commission and fee of recommendation to NEEQ was RMB59 million, representing a year-on-year growth of 155.16%.

In addition, the Company carries out its overseas investment banking business through GF Holdings (Hong Kong) (including its subsidiaries), a wholly owned subsidiary. During the Reporting Period, GF Holdings (Hong Kong), through its subsidiaries, acting as lead underwriters, completed 5 projects (including refinancing and bond issue). Among them, the IPO of GF Securities H Shares in which the subsidiaries of GF Holdings (Hong Kong) acted as a joint sponsor and lead underwriter raised funds with a total amount of HK\$32,079 million. During the Reporting Period, the total revenue from investment banking and other income were RMB26.1518 million, representing a year-on-year decrease of 41.21%.

2. Wealth management business

The wealth management business of the Group consists of retail brokerage, wealth management, margin financing and securities lending and repurchase transactions. During the report period, the total revenue and other income from wealth management were RMB13,559 million, representing a year-on-year growth of 367.38%.

(1) Retail brokerage and wealth management business

The Company offers brokerage services for clients trading in stocks, bonds, funds, warrants, futures and other tradable securities. The increasingly active domestic capital market has boosted marked increase in the trading amount of stocks and funds on the A share market. In the first half of 2015, the total volume was RMB146.99 trillion, representing a year-on-year growth of 545%. Note: Percentage of assets represents the percentage of assets in total assets and percentage of liabilities represents the percentage of liabilities in total liabilities

As at June 30, 2015, total assets of the Group amounted to RMB517,126 million, representing an increase of RMB277,026 million or 1.15 times over the end of 2014. Total liabilities of the Group was RMB442,483 million, representing an increase of RMB243,760 million or 1.23 times over the end of 2014. Bank balances and clearing settlement funds in aggregate accounted for 44.84% of total assets; financial assets at fair value through profit or loss and available-for-sale financial assets in aggregate accounted for 22.12%; advances payment by financing customers accounted for 27.10% and financial assets held under resale agreements accounted for 2.14%.

As at June 30, 2015, non-current assets of the Group amounted to RMB9,961 million, representing an increase of 54.70% over the end of 2014. The increase was mainly due to the increase in available-for-sale financial assets, interests in associates and joint ventures and financial assets held under resale agreements. As Current assets of the Group amounted to RMB507,166 million, representing an increase of RMB273,504 million or 1.17 times over the end of 2014. Among the current assets of the Group, bank balances and advance payment by financing customers in aggregate increased RMB213,417 million, which was attributable to the growth in scale of our brokerage business and the increase of our margin financing and securities lending business as driven by favorable market conditions. Current liabilities of the Group was RMB355,041 million, representing an increase of 1.14 times over the end of 2014, mainly due to the increase in accounts payable to brokerage clients, financial assets sold under repurchase agreements within one year and short-term financing payables. Non-current liabilities of the Group was RMB87,441 million, representing an increase of 1.63 times over the end of 2014, which was due to our issuance of subordinated bonds and the increase in financial assets sold under repurchase agreements after one year. As at the end of June 2015, net current assets of the Group amounted to RMB152,124 million, representing an increase of RMB83,993 million or 1.23 times over the end of 2014, primarily due to our issuance of subordinated bonds with maturities of more than one year and increase of financial assets sold under repurchase agreements to fund our working capital, which resulted in a bigger increase of current assets than that of current liabilities.

As at June 30, 2015, equity attributable to owners of the Company amounted to RMB72,587 million, an increase of RMB32,976 million or 83.25% over the end of 2014. The increase was due to our issuance of H Shares for capital replenishment in April 2015 and the increase in net profit of the Group. As at the end of June 2015, the gearing ratio of the Group was 77.25% (excluding the effect of clients' brokerage deposits), representing an increase of 1.79 percentage points as compared to 75.46% at the end of 2014. The Group maintained a relatively stable structure of assets and liabilities.

Borrowings and bond financing

3. Analysis on Consolidated Statements of Cash Flow

As at June 30, 2015, cash and cash equivalents of the Group amounted to RMB43,162 million, representing an increase by 4.51 times as compared to RMB7,827 million as at June 30, 2014.

Net cash used in operating activities was RMB61,561 million during the period from January to June 2015, a RMB56,333 million increase over the corresponding period of 2014. The increase primarily reflected (1) an increase of RMB72,774 million in operating cash outflow as a result of further increase in advance payment by financing customers; (2) an increase of RMB34,839 million in operating cash outflow as a result of the increase in financial assets at fair value through profit or loss. These operating cash outflows were offset by an increase of RMB38,554 million in operating cash inflow from financial assets sold under repurchase agreements.

Net cash used in investing activities was RMB14,453 million during the period from January to June 2015, a RMB17,622 million increase over the corresponding period of 2014, mainly due to an outflow of RMB14,762 million as a result of the increase in our investment in available-for-sale financial assets.

Net cash generated from financing activities was RMB100,207 million during the period from January to June 2015, a RMB96,952 million increase over the corresponding period of 2014, primarily attributable to the proceeds from our issuance of bonds and short-term financing payables as well as the listing of H Shares.

5. A pioneer in the Internet finance industry

The Company has always attached importance to innovative applications in the Internet sector and is a broker with leading data processing capability which has formulated its financial big data strategy early and established its big data operation cluster in the industry and walks in the forefront of Internet finance innovation in the industry. In particular, achievements made by the Company in the sectors of platform, account, service and marketing have all achieved the industry-leading position. First, the Company has established five Internet channels, namely mobile securities, Official WeChat, E-Taojin website, online trading finance terminal and web-based trading and enhanced the experience of customers in securities transactions, Internet banking and online business process through continued platform innovation. Currently, data such as the number of users of the five channels all achieved the industry-leading position. The number of mobile securities has exceeded 6.8 million. Product sales and transfers on the E-Taojin e-commerce platform for the first half year exceeded RMB25 billion. The number of users of Public WeChat ID has exceeded 2 million. Secondly, the Company actively developed its Internet banking business and established convenient Internet banking accounts based on its Internet securities innovation qualification through account innovation and product innovation and launched the Internet cash management product, Taojin Wallet (淘金錢包), and provided the Taojin market for the transfer of products to establish an Internet banking business chain for investors. With respect to service innovation, the Company made use of the mobile Internet technology to establish the "Golden Key (金鑰匙)" system and instantly aligned the demand from a large number of online customers with more than 7,000 professional consultants distributed throughout the country offline. The Company also established its O2O service system to provide responsive "GF Surely Answer (廣發必答)" services to customers on the basis of 24 hours a day, 7 days a week. The model capitalizes on Internet thinking and mechanism innovation such as mobile platform, decentralized operations, the approach of competing for orders through crowdsourcing (眾包搶單模式) and electronic wallet and market incentive mechanism for customer evaluation to break the traditional service model and significantly improve the service efficiency and service quality. Apart from the Internet innovation of the service model, the marketing system of the Company also actively transformed to Internet. On one hand, the Company seized the Internet traffic entrance through using search engines to drive traffic and strategic cooperation with Sina. On the other hand, the Company innovated the Internet marketing model and implemented visual tracking of the marketing performance of individuals and offered timely incentives through technical means such as customized QR code to achieve "more pay for more work". Besides, the Company fully mobilized all branches and the enthusiasm of all marketing service staff to make it an important marketing model of the Company.

6. The business outlets nationwide cover the mainly economically advanced areas

As of June 30, 2015, the Company has set up 19 branches, 256 securities business departments, ranking fifth in the industry, and its business network covers 31 provinces, direct-controlled municipalities and autonomous regions in Mainland China. It also encompasses the economically advanced regions including the Pearl River Delta, Yangtze River Delta, Shandong Peninsula, Circum-Bohai Sea Region, and main provincial capitals, thus forming a nationwide network system for brokerage business. These regions boast of rapid economic development and abundant funds, and the sufficient client resources guarantee the sound economic benefit for the business outlets of the Company. As of the Reporting Period, the Company's investment consultancy team has over 1,900 members, ranking first in the industry. The investment consultants possess, on average, more than 8 years of consultancy experience, and are thus capable of offering professional opinions on asset configuration and product selection; the Company possesses more than 5,000 professional consultants, who, together with the investment consultants, form a robust matrix of client management. Through the detailed classification of clients, the Company implements differentiated client management and offers professional, customized financing product services for the HNW clients and clients of wealth management. The wholly-owned subsidiary of the Company GF Futures has set up 26 futures brokerage branches in 16 provinces and direct-controlled municipalities, ranking first among the futures companies in terms of the number of outlets; the 154 securities branches have obtained the futures intermediary brokerage qualifications, thus capable of introducing clients to GF Futures and forming a sprawling service sphere.

7. Main business indicators rank among the top in the industry in recent years

The Company has upheld the management philosophy of stable operations and sustainable innovation in recent years, and has endeavored to forge ahead and make pioneering achievements in the fiercely competitive, complex and changing environment. It has withstood the test of major changes in the industry, and gradually become one of the securities firms with the largest influence in the Chinese market. The business income, net profit and other main indicators rank among the top in the industry. The details are as follows:

8. Time-tested effective risk management mechanism

The Company's risk management ability is outstanding in the industry, and has been repeatedly tested in the Company's development process. The Company is one of the first batch of pilot compliance management brokerages selected by the China Securities Regulatory Commission, one of the first brokerages to implement a comprehensive risk management strategy, and one of four major brokerages which have not received investment or restructuring due to operating losses among the first batch of brokers established from the end of the 80's to the early 90's. The Company has consistently adhered to a modest risk preference and core management philosophy of income corresponding to risks, supported the steady development of the business through modest risk-bearing, effective risk management and independent oversight of risk, and ensured that the Company remains ahead in each business line. The Company sets up a comprehensive risk management system covering risk mechanism, organization, system, index, personnel and culture, and actively builds its risk management system matching with new business, to support business innovation development. Over the years, the Company's asset quality has been excellent, the main risk management indicators are better than the regulatory indicators, the safety margin of leverage regulatory indicators is big, with a strong ability to resist risks.

(1) During the Reporting Period, the risks affecting the Company's business operation activities mainly are: policy risk, liquidity risk, market risk, credit risk, operational risk and information technology risk, as follows:

① Policy risk

Policy risk refers to the unfavorable influence on the operation of a securities firm by changes of national macro control measures, laws, regulations, regulatory policies and trading rules related to the securities industry, etc. On the one hand, the national macro control measures greatly affect the securities market, changes and adjustment of macro policy, interest rates and exchange rates are closely related to the trend of the financial market. On the other hand, the securities industry is a highly regulated industry, the regulatory policy directly affects the securities firm's operation fluctuation, if the Company failed to adapt to the changes of policies and laws in the daily management, it may be subject to administrative penalties such as fines, suspensions or revocation of business qualifications, resulting in economic losses or loss of reputation, and even trusteeship or dissolution.

② Liquidity risk

Liquidity risk is the risk that the Company may not hold enough funds in time with reasonable cost to pay due debts, perform other payment obligations and meet capital needs in normal business operation. Liquidity risk factors and events include but not limit to: asset liability structural imbalance, asset liquidity difficulties, operating losses, counterparty delay payment or default, as well as credit risk, market risk, reputation risk and other types of risk which may convert to the liquidity risk. The Company regards liquidity as its lifeblood, and liquidity risk management as a top priority of risk management, through continuing active liquidity management and liquidity risk identification, measurement, monitoring and control, timely and effectively preventing and managing corporate liquidity risk.

③ Market risk

Market risk refers to the risk of loss of business due to the unfavorable change of market price (prices of equity securities, interest rates, exchange rates or commodity price, etc.). Market risk can be divided into equity price risk, interest rate risk, exchange rate risk and commodity price risk, respectively referring to risks brought to company due to changes of equity price, interest rates, exchange rates and commodity prices. Because of the limited scope of investment, the market risks faced by securities firms are mainly concentrated in equity price risk and interest rate risk. However, along with the rapid expansion of business scope of directly and indirectly wholly-owned subsidiaries of securities firms, as well as the international advance of domestic securities firms, risks of exchange rate fluctuations and other types of price risks borne by securities firms are increasing. In addition, domestic on-exchange and OTC derivatives market in China is at the initial stage, and the corresponding market mechanism is not perfect, lacking available effective risk hedging tools. For the securities firms, as the main market maker and the risk hedger, the high speed development of the derivatives market not only increases the exposure to the market risk, but also increases the complexity of the market risk faced by the securities firms, raising great challenges to the market risk management of securities firms.

④ Credit risk

Credit risk is the risk that the issuer's or counterparty's failure to fulfill the obligations under a contract or the change in the credit rating or performance capabilities results in the change of market value of the debt, causing damage and loss to the Company. The Company is currently facing credit risks from bond investment business, derivatives trading business, financing and securities lending business, agreed repurchase securities transaction business, stock-pledged repurchase business, other innovative financing business, credit products investment and other businesses in respect of which the Company bears responsibilities or has made payment commitments. With the improvement of the securities firm's leverage and the continuous development of innovative businesses, the Company's credit risk is becoming more and more complex, and the credit risk exposure is increasing day by day. In addition, the increase of the credit market default rate, the concentration of the specific industry risk events and the decline of the degree of prosperity, etc., all proposed greater challenges to the future credit risk management of the securities firms.

⑤ Operational risk

Operational risk is the risk of loss caused by imperfect or problematic internal procedures, personnel, systems and external events. Each department and business line of securities firms (including front business department and the back office supporting department) face operational risk, characterized by wide coverage and diversity, including daily business process flaws with high occurring frequency but relatively low loss, and unexpected events with low frequency of occurrence and significant impact, making operational risk management an important part of implementing comprehensive risk management target by securities firm. To prevent operational risk, securities firms need to build a unified operational risk management framework, continuously improve internal control management system, including the development and improvement of the operation process of key business lines, strengthening the auditing and inspection work, collection and analysis of the operational risk events and data of loss.

⑥ IT risk

Securities firms rely on the use of high-tech represented by information technology, which has greatly enhanced their operational efficiency and core competitiveness. The Company's investment business, asset management business, brokerage business and many other business and back-stage management are highly dependent on the support of computer networks and information management softwares; information technology has played a key role in promoting the Company's business. In promoting the development of the securities industry, the information technology has also brought a considerable risk. System design and operation will be greatly affected by the quality of electronic equipment and system softwares, the operation and maintenance of corporate systems, overload of application software business operation, the level of industry service providers, virus and hacker attacks, data loss and leakage, abnormal access to operating authorization, power, telecommunications, communications, natural disasters, etc.

(2) Risk prevention measures adopted (or to be adopted) by the Company for aforesaid risks

① Establishment of overall risk management system

Under the backdrop of innovative development and loosened supervisory environment of securities industry, the Company's operating leverage continues to improve, innovative business and products develop vigorously, and business and product risk characteristics are becoming increasingly complex. In order to ensure the implementation of its business strategy, the Company has in recent years continued to establish a comprehensive risk management system, improve the risk management system, optimize the risk management organization structure, construct risk management information system, improve risk management skills, and introduce professional risk management personnel. Under the guidance of the Company's overall development strategy, the Company continuously constructs strong, independent and strict management and control system, establishes effective comprehensive risk management strategy, organization, system, technology and personnel system, promotes the effective use of risk resources, control risk within the scope of the Company's risk preference, and support steady development of the business of the Company and the development of innovative business and products.

a. Risk management organization structure

In the process of development and management, the Company has always attached great importance to the construction of its risk management system, which lays a solid foundation for the comprehensive risk management system in the pursuit of steady operation. With the introduction of the Comprehensive Risk Management Criterion of Securities Firms, the Company has continued to improve the organization system of risk management, and implemented it through relevant regulations. The corporate risk management organization structure is composed of four levels, i.e. the board of directors and its Risk Management Committee; senior management, Risk Control Committee and Asset Allocation Committee; each backstage management function department; each business department; each level of organization and personnel perform risk management responsibilities within the scope of authorization.

b. Risk management system

Responding to adjustment of external regulations and policies as well as business development needs, the Company continues to promote risk management system process incorporating the refinement and optimization of its external regulatory requirements, the company's business needs, risk prevention and control measures into the relevant system flow in a timely manner. At present, the Company has established four levels of risk management: the first level is the basic system of corporate risk management, which is the guideline document covering all business and management areas; the second level is general risk management measures based on the corporate risk management system and applicable to the whole Company; the third level is detailed risk management provisions based on the general rules and regulations; the fourth level is detailed standards and operating guidelines of risk management instituted by each department based on the foregoing rules and regulations. To continuously improve the construction of risk management system, the Company will closely follow the latest regulatory requirements, and continue to improve the Company's risk management system according to the requirements of Comprehensive Risk Management Criterion of Securities Firms and the need of risk management for innovation business.

c. Risk preference system

Risk preference is the risk nature and level the Company is willing to bear in order to achieve the desired revenue objectives, and the basic attitude towards balancing between the risks and benefits of the Company's highest decision-making body after analysis of the Company's various risk factors, including types of risk, number of risks, and incremental risks in order to increase profit and in what way the Company is willing to take risks. The core elements of the Company's risk preference system are: the Company's risk preference, risk tolerance and business risk limits. Risk tolerance is the risk boundary which depicts the Company's positions in different dimensions such as overall and typical risks via quantitative indicators, such as general risk under the guidance the risk preference framework. Risk limits are the limits set on key risk indicators within the scope of risk preference and risk tolerance, according to which monitoring and control of business is carried out. The risk limit is the maximum risk that the Company can tolerate in all kinds of risk exposure and the risk level that the Company is willing to bear, which is the implementation of risk preference in business operation. Risk limits indicators are different as per specific business types. Currently, the Company has established risk limit system, including regulatory limits, stop-loss limits, VaR limits, sensitivity index limits, transaction limits, capital limits, concentration limits, etc., which have been used in daily risk monitoring and management.

② Management of various risks

a. Liquidity risk management

The Company has set up a fund management department in the field of liquidity risk management as the first defense, the risk management department as the second defense, and clarified the responsibilities of various departments and coordination mechanism through the liquidity risk management system.

b. Market risk management

The Company follows the principle of active management and quantitative orientation, sets the Company's market risk tolerance according to the Company's risk preference, and ensures that the market risk to be borne by the Company is within its risk tolerance through identification, assessment, measurement, supervision and management measures. With the expansion of the Company's derivatives business and overseas business, for the purposes of identification, assessment and management of more complex market risks and model risks, the specific measures of market risk management of the Company include: 1) the formation of professional risk management team by introducing risk management personnel with professional skills and experience from a number of international financial institutions in the fields of derivatives investment risk management, risk management of overseas investment, model risk management and risk control system development; 2) an international mature market risk management system is introduced and launched, supporting development of the Company's transactions in the overseas market and all kinds of complex derivative financial products. 3) a pricing model of risk management framework is established, covering rating, development, verification, implementation, evaluation, use, monitoring and other aspects of the model, effectively managing model risks of investment transactions carried out through various complex financial instruments.

c. Credit risk management

Through effective risk identification, prudent risk assessment and decision-making, dynamic risk measurement and monitoring, risk reporting and response, the Company manages the entire process of credit risk, with the aim of effectively preventing or avoiding the occurrence of risk events, reducing the losses brought by risks to the Company and maximizing yields within the scope of accepted credit risk after risk adjustment.

d. Operational risk management

The Company focuses on the operability and standardization of the system scientificness and effectiveness of the design, and vigorously promotes the normalization of flow construction. The Company manages operational risks through business control and self-inspection, risk control and internal control audit, ensuring full coverage and supervision of all the business lines. The Business Department is responsible for the management system and process construction of the business under its charge, management, monitoring and reporting of operational risk in the business and management; as the functional departments of operational risk management, the Risk Management Department and the Compliance Department provide management tools and methods, develop management standards, and comprehensively analyze the reports; the Audit Department conducts follow-up supervision and accountability investigation on operational risk management, control and supervision system.

Against the sharp fall in the stock markets in June and July this year, the Company has taken effective measures in a timely manner, responded properly and pulled through the crisis steadily.

Section 3 Report of the Board

Initial investment in share proceed projects and replacement with share proceeds	<p>This share proceed project was initially invested by the Company with its self-raised funds, and part of share proceed projects was implemented prior to actual availability of the share proceeds. As of August 17, 2011, the Company initially invested a total of RMB1,176,569,100.35 to share proceed projects with its self-raised funds, which was verified by Deloitte Touche Tohmatsu Certified Public Accountants LLP who issued the Report on Specific Audit on Initial Investment by GF Securities Co., Ltd. with Self-raised Funds in Share Proceeds Projects (《關於廣發證券股份有限公司以自籌資金預先投入募集資金投資項目情況的專項審核報告》) (De Shi Bao (He) Zi (11) No. E0065). On October 21, 2011, as considered and approved by the Company's seventh meeting of the seventh session of the Board of Directors and fourth meeting of the seventh session of the Board of Supervisors, the Company replaced its self-raided funds used for initial investment in share proceed projects with an amount of RMB1,176,569,100.35 from share proceeds. Such event will not have an impact on normal progress of the investment schedule with share proceeds, nor mean a change to the use of share proceeds. Such event was agreed by the Company's independent directors and a specific audit report was issued by the accounting firm. Necessary approval procedures were completed and the sponsors had no disagreement on this event. The Company's such act and procedures to replace its self-raised funds used for initial investment in share proceeds projects with share proceeds are in compliance with the relevant laws, regulations and the requirements of regulatory documents.</p>
Idle share proceeds used for short-term liquidity	<p>On April 18, 2014, the Company applied part of the idle share proceeds for short-term liquidity amounting to RMB1,149,000,000.00, with a term of twelve months commencing from the date on which the above was considered and approved by the Board of Directors. Such event was approved at the 47th meeting of the seventh session of the Board of Directors held by the Company on April 18, 2014, for which, the Board of Supervisors and independent directors have given their consents, and the sponsors had no disagreement on this event. The Company's such decision procedures for the use of part of its idle share proceeds for liquidity are legal, valid and in compliance with the relevant requirements of the Guidance on Normal Operation of Companies Listed on the Main Board of the Shenzhen Stock Exchange (《深圳證券交易所主板上市公司規範運作指引》) and the Company's Rules on Management of the Use of Share Proceeds (《募集資金使用管理制度》). The Company has returned and transferred its share proceeds with amounts of RMB300,000,000, RMB149,000,000 and RMB700,000,000, respectively, which were used for short-term liquidity as mentioned above, to the dedicated account for share proceeds, on November 12, 2014, December 19, 2014 and April 16, 2015, respectively. Such proceeds were used in a term not exceeding twelve months.</p> <p>On April 27, 2015, the Company applied part of the idle share proceeds for short-term liquidity amounting to RMB700,000,000.00, with a term of twelve months commencing from the date on which the above was considered and approved by the Board of Directors. Such event was approved at the 15th meeting of the eighth session of the Board of Directors held by the Company on April 27, 2015, for which, the Board of Supervisors and independent directors have given their consents, and the sponsors had no disagreement on this event. The Company's such decision procedures for the use of part of its idle share proceeds for liquidity are legal, valid and in compliance with the relevant requirements of the Guidance on Normal Operation of Companies Listed on the Main Board of the Shenzhen Stock Exchange (《深圳證券交易所主板上市公司規範運作指引》) and the Company's Rules on Management of the Use of Share Proceeds (《募集資金使用管理制度》). As approved by the Commission license [2015] No. 347 "Approval on the Issuance of Overseas Listed Foreign Shares by GF Securities Co., Ltd" (《關於核准廣發證券股份有限公司發行境外上市外資股的批覆》) issued by the CSRC on March 5, 2015, the Company was listed on the Main Board of the Hong Kong Stock Exchange on April 10, 2015 and offered 1,479,822,800 overseas listed foreign shares (H Shares) in total under the Public Offering and the International Placing at an issue price of HK\$18.85 per share, thereafter, the Company issued 221,973,400 H Shares at HK\$18.85 per share on April 13, 2015 upon the exercise of an over-allotment option; the total number of the H Shares issued by the Company is 1,701,796,200 and the proceeds from the H Share issuance amount to HK\$32.079 billion in total.

According to the H Shares prospectus, approximately 50% of the net proceeds from the offering of H Shares will be used in the development of wealth management business, approximately 20% in investment management, investment banking and trading and institutional client services businesses, as well as approximately 30% in international operations. To the extent that part of such proceeds is not required temporarily for those purposes mentioned above, it will be applied to replenishment of short-term liquidity for investment in liquid assets classes so as to maintain and even create value.

From April 10 to May 6, 2015, the proceeds from H Shares issuance were settled to RMB25.68 billion in total with HK\$4.54 million remaining in the Company's overseas offering bank account. As of June 30, 2015, of the proceeds from the issuance of H Shares, RMB10.855 billion or approximately 42.27% was used in the wealth management business; RMB4.342 billion or approximately 16.91% was used in the investment management, investment banking and trading and institutional client services businesses, and RMB10.483 billion or approximately 40.82% are used in the replenishment of short-term investments business.

The proceeds from H Shares that will be used in international operations will be invested in phases as planned under the principle of prudence. On April 20, 2015, it is resolved to inject HK\$4.16 billion to GFHK with the proceeds from H Shares issuance on the 14th meeting of the eighth session of the Board of Directors held by the Company. The capital injection is in progress.

II. LITIGATIONS

1. GF Commodity Markets appealed on the case of confirmation on cargo ownership against Ningbo Yager International Trade Transportation Company (寧波雅戈爾國際貿易運輸有限公司) (“Yager”) and Shanghai Hengye International Logistics Co., Ltd. (上海恒燁國際物流有限公司) (“Hengye”)

In November 2013 and June 2014, GF Commodity Markets stored 1,269.25 tonnes of polyethylene in batches in the warehouse of Hengye in Shanghai. On October 11, 2014, GF Commodity Markets issued an instruction for taking delivery of goods to Hengye, but Hengye refused to take out the goods from the warehouse due to a dispute over cargo ownership. On October 14, 2014, Yager applied to the People’s Court of Jinzhou Prefecture of Ningbo City (“Jinzhou Court”) and seized the 1,269.25 tonnes of polyethylene sent for storage in the warehouse of Hengye by GF Commodity Markets. On October 17, 2014, GF Commodity Markets made an application to Jinzhou Court dissenting the property seizure, and Jinzhou Court informed GF Commodity Markets on October 30, 2014 that its application was rebutted. On November 5, 2014, Yager sued Hengye in the Jinzhou Court (case number: 2014 Yong Jin Shang Chu Zi No.1904), requesting Hengye to hand over 3,909.328 tonnes of polyethylene to it. On November 27, 2014, GF Commodity Markets applied to Jinzhou Court to participate in the trial of the case 2014 Yong Jin Shang Chu Zi No.1904 as a third party, and asked Jinzhou Court to confirm that the ownership of 1,269.25 tonnes of polyethylene belonged to GF Commodity Markets. Jinzhou Court consented to the participation of GF Commodity Markets in the litigation as a third party, but the request of GF Commodity Markets was refused by judgment of the court on May 15, 2015, and GF Commodity Markets was liable to bear the legal costs of RMB55,340. On June 3, 2015, GF Commodity Markets filed an appeal to the Intermediate People’s Court of Ningbo City (case number: 2015 Zhe Yong Shang Zhong No.823), demanding the judgment at the first instance be quashed and confirming the ownership of 1,269.25 tonnes of polyethylene belonged to GF Commodity Markets. The proceedings of the case are still on-going currently.

2. GF Commodity Markets sued Guangdong Zhenrong Energy Co., Ltd. (“Zhenrong”) for repayment of money in default under sale and purchase agreement and petitioned to declare Zhenrong in bankruptcy

On June 24, 2014, GF Commodity Markets and Zhenrong signed the Sale and Purchase Agreement, pursuant to which Zhenrong purchased 360 tonnes of cathode nickel by way of a trade acceptance bill (in the amount of RMB50,937,840 with the due date on December 22, 2014, for which Zhenrong was both the payer and acceptor). On June 25, 2015 GF Commodity Markets delivered 360 tonnes of cathode nickel to Zhenrong. On December 15, 2014, GF Commodity Markets submitted the trade acceptance bill to the Lujiazui Software Park sub-branch of ICBC for bill collection, and was informed by the Lujiazui Software Park sub-branch of ICBC that there was insufficient balance in the bank account of Zhenrong and the bill was dishonoured. After several attempts to demand for payment, Zhenrong paid RMB5,000,000 to GF Commodity Markets on February 13, 2015, and no more payment was made thereafter. On May 28, 2015, GF Commodity Markets filed a civil case to the First Intermediate People’s Court of Shanghai (case number: 2015 Hu Yi Zhong Min Si Shang Chu Zi No.25), demanding Zhenrong to repay the amount owed and costs including penalty. On June 8, 2015, Zhenrong disputed over the jurisdiction of the court but was rejected by the court on June 23, 2015. On July 8, 2015, Zhenrong filed an appeal against the ruling on the jurisdiction dispute, and the jurisdiction of the case is now under review by the Higher People’s Court of Shanghai.

On June 16, 2015, GF Commodity Markets filed a petition for bankruptcy against Zhenrong in the Intermediate People's Court of Guangzhou (case number: 2015 Sui Zhong Fa Min Po Zi No.13) on the grounds that Zhenrong was unable to repay debts after due date and demanded the court to declare Zhenrong bankrupt for liquidation. On July 14, 2015, a hearing took place in the Intermediate People's Court of Guangzhou. At present, materials of the case are still under deliberation by the court.

Report on Review of Condensed Consolidated Financial Statements

TO THE BOARD OF DIRECTORS OF GF Securities Co., Ltd.

(Incorporated in the People's Republic of China with limited liabilities)

INTRODUCTION

We have reviewed the condensed consolidated financial statements of GF Securities Co., Ltd. (the “Company”) and its subsidiaries (collectively referred to as the “Group”) set out on pages [•] to [•], which comprise the condensed consolidated statement of financial position as at 30 June 2015 and the related condensed consolidated statement of profit or loss, statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the six-month period then ended, and certain explanatory notes. The Rules Governing the Listing of Securities on the Main Board of The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) issued by the International Accounting Standard Board. The directors of the Company are responsible for the preparation and presentation of these condensed consolidated financial statements in accordance with IAS 34. Our responsibility is to express a conclusion on these condensed consolidated financial statements based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with International Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” (“ISRE 2410”). A review of these condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.

Without qualifying our review conclusion, we draw attention to the fact that the comparative condensed consolidated statement of profit or loss, statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the six-month period ended 30 June 2014 and the relevant explanatory notes included in these condensed consolidated financial statements have not been reviewed in accordance with ISRE 2410.

1. GENERAL STATEMENTS OF THE GROUP

With the approval of the People's Bank of China, Guangdong Development Bank (廣東發展銀行) (now known as China Guangfa Bank) established a securities department on 9 April 1991. With the approval of the Guangdong Administration for Industry and Commerce, the Company was duly established as the Securities Department of Guangdong Development Bank (廣東發展銀行證券業務部) on 21 May 1993. On 25 January 1994, the Company converted into Guangdong Guangfa Securities Company (廣東廣發證券公司) whose capital was contributed by Guangdong Development Bank with its own funds. On 26 December 1996, the Company converted into a limited liability company and changed its name to Guangfa Securities Limited Liability Company (廣發證券有限責任公司). On 26 August 1999, the Company was spun off from Guangdong Development Bank as required by the sectoral regulation of the financial industries under the PRC laws. On 25 July 2001, the Company converted into a joint stock company and changed its name to GF Securities Co., Ltd. (廣發證券股份有限公司). On 12 February 2010, the Company became listed on the Shenzhen Stock Exchange by completing a reverse takeover of Yan Bian Road Construction Co., Ltd. (延邊公路建設股份有限公司) ("Yan Bian Road"), a company then listed on the Shenzhen Stock Exchange with the stock code 000776. On 10 April 2015, the Company issued H shares which were listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "Hong Kong Stock Exchange").

The registered office of the Company is located at 43rd Floor (Room 4301-4316), Metro Plaza, No.183-187, Tianhe North Road, Tianhe District, Guangzhou, People's Republic of China ("PRC").

The Group and the Company is principally engaged in securities brokerage, securities investment consultation, financial advisory business relating to securities trading and securities investment, securities underwriting and sponsorship, securities proprietary trading, provision of futures intermediary services for futures companies, margin financing and securities lending, proxy sale of financial products, securities investment fund custodian, market-making of stock options, asset management, project and investment management and commodity futures brokerage, financial futures brokerage and futures investment advisory.

The financial statements are presented in Renminbi ("RMB"), which is also the functional currency of the Company.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

The condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 “Interim Financial Reporting” and the applicable disclosure requirements set out in Appendix 16 of the Rules Governing the Listing of Securities on the Hong Kong Stock Exchange. The condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual financial statements for the year ended 31 December 2014.

Principal accounting policies

The accounting policies adopted in the preparation of the condensed consolidated financial statements are consistent with those followed in the preparation of the Group’s annual financial statements for the year ended 31 December 2014, except for the adoption of the amendments to standards effective on 1 January 2015, as follows:

Amendments to IAS 19	Defined Benefit Plans: Employee Contributions
Amendments to IFRSs	Annual Improvements to IFRSs 2010-2012 Cycle
Amendments to IFRSs	Annual Improvements to IFRSs 2011-2013 Cycle

The application of the above amendments to IFRSs in the current period has had no material effect on the amounts reported in these condensed consolidated financial statements and/or on the disclosures set out in these condensed consolidated financial statements.

Under the Enterprise Income Tax of the PRC (the "EIT Law") and the Implementation Regulation of the EIT Law, the tax rate of the Company and its subsidiaries in the PRC is 25%, except for as mentioned below.

Upon the approval of the "Circular of Tax Reduction from the Municipal Tax Department of Urumqi Economic and Technological Development Zone" ("烏魯木齊經濟技術開發區地方稅務局減免稅備案通知書" (烏經濟區地稅股備字[2012] 25號)), GF Xinde Investment Management Co., Limited, a wholly-owned subsidiary, is subject to a tax rate of 12% from 25 May 2012 to 31 December 2015.

Hong Kong Profits Tax is calculated at 16.5% of the estimated assessable profit for both periods. Tax arising in other jurisdictions is calculated at the rates prevailing in the relevant jurisdictions.

13. EARNINGS PER SHARE ATTRIBUTABLE TO OWNERS OF THE COMPANY

The calculation of basic earnings per share attributable to owners of the Company is as follows:

	Six months ended 30 June	
	2015	2014
	RMB'000	RMB'000
	(unaudited)	(unaudited)
Earnings for the purpose of basic earnings per share:		
Profit for the period attributable to owners of the Company	8,405,961	1,674,990
Number of shares:		
Weighted average number of share in issue(Note) (2014: Number of shares in issue) (in thousand)	6,668,605	5,919,291
Earnings per share:		
Earnings per share (RMB)	1.26	0.28

The over allotment options granted by the Company in April 2015 has no significant impact in the computation of diluted earnings per share for the six months ended 30 June 2015. The Group had no dilutive potential ordinary shares outstanding for the six months ended 30 June 2014.

Note: The time-weighting factor of weighted average number of shares in issue in 2015 is the number of days that the shares are outstanding as a proportion of the total number of days in the period.

16. AVAILABLE-FOR-SALE FINANCIAL ASSETS – continued

- (i) Securities and funds traded on the Shanghai Stock Exchange and the Shenzhen Stock Exchange are included in the “Listed outside Hong Kong” category.

Note 1: Other investments mainly represent investments in: (i) collective asset management products issued and managed by the Group, whereby the Group’s interest in and exposure to them are not significant; (ii) wealth management products issued by banks; (iii) targeted asset management products (or trust investments) managed by non-bank financial institutions, which mainly invest in debt securities, publicly traded equity securities listed in the PRC and loans. The Group has committed to hold its investments in collective asset management products which are managed by the Group till the end of the investment period ranging from one to three years.

The unlisted equity securities held by the Group are issued by private companies in, among others, the manufacturing industry, energy technology, and medical or electronic communication sectors. As the reasonable range of fair value estimation is so significant that the directors of the Company are of the opinion that the fair value cannot be measured reliably, these equity securities are measured at cost less impairment at the end of each reporting period.

Fair value of the Group’s available-for-sale investments are determined in the manner described in note 45.

As at 30 June 2015, the listed equity securities of the Group included approximately RMB1,227.97 million (31 December 2014: RMB510.41 million) of restricted shares. The restricted shares are listed in the PRC with a legally enforceable restriction on these securities that prevents the Group to dispose of within the specified period.

As at 30 June 2015, the Group entered into securities lending arrangement with clients that resulted in the transfer of available-for-sale equity securities and exchange-traded funds with total fair values of RMB348.73 million (31 December 2014: RMB580.59 million) to clients. These securities continued to be recognised as financial assets.

In the opinion of the directors, non-current available-for-sale financial assets are not expected to be realised within one year from the end of the reporting period.

Note: The amount represents the principal and deposits paid in relation to equity return swap contracts entered by the Group, and mature within 2 years as at 30 June 2015. These contracts contain non-closely related embedded derivatives as their returns are linked to the fluctuation in certain stock index and stock shares. In the opinion of the directors, the fair values of these embedded derivatives of certain contracts are considered insignificant. Therefore, the related embedded derivatives being bifurcated from their respective host contracts are not accounted for. For those embedded derivatives with significant fair values, they are accounted under note 23 after being bifurcated from their respective host contracts.

44. FINANCIAL RISK MANAGEMENT

44.1 Risk management policies and organisation structure

(1) Risk management policies

The Group's risk management objectives are to achieve a proper balance between risks and yield, minimise the adverse impacts of risks on the Group's operating performance, and maximise the benefits of the shareholders and other stakeholders. Based on these risk management objectives, the Group's basic risk management strategy is to identify and analyse the various risks the Group exposes to, and to establish an appropriate tolerance for risk management practice, so as to monitor, notify and respond to the risks regularly and effectively and to control risks at an acceptable level.

The risks the Group exposes to in daily operating activities mainly include market risk, credit risk and liquidity risk. The Group has established policies and procedures accordingly to identify and analyse the risks. The Group has set up appropriate risk indicator, risk limits, risk policies and internal control process. The Group also manages risks with information system on a continuous monitoring basis.

(2) Structure of the risk-management organization

The Group adopts a four-level risk management organisation structure system, namely "board of directors and its subordinated risk management committee, management executives and risk control committee and asset allocation committee, various control and supporting departments, and business departments". First-line risk manage organisations have been set up in all major business departments of the Company. Organisations and staff of all levels are required to perform their authorised risk management duties with clear segregation of duties and emphasis on mutual collaboration. The Group's main back offices and middle offices are risk management department, compliance and legal affairs department, internal auditing department and treasury department. These departments cooperate with each other and each focus on specific aspects, perform risk assessment before the projects implement, on-going control, investigation and evaluation after completion, and contribute to the sustainable development of the business for the Group.

Risk management department, a standing body of the Group's risk control committee, takes charge of the independent assessment and monitoring of the Group's market risk and credit risk. It coordinates with each department regarding the management of model risk, liquidity risk and operational risk; supervises the implementation of the Group's risk policies such as risk limits; assesses, monitors and reports on the Group's risk capitals; organizes and implements comprehensive and specific stress tests; and carries out routine activities of the Group's risk control committee and so on. Compliance and legal department is the core department responsible for the compliance management of the Group, including the compliance of the Group's business and employees, and the Group's legal matters. The internal auditing department is responsible for independently and objectively auditing, supervising, assessing and impelling to improve the management performance of all the departments' risk management, internal control and operating results.

44. FINANCIAL RISK MANAGEMENT – *continued*

44.2 Credit Risk

Credit risk is the risk of loss due to a company's failures or inability to fulfil its obligations, or the downgrade of credit rating of it. The credit risk the Group exposed to mainly relates to the following businesses: (i) fixed income financial assets and the corresponding derivative investments; (ii) financing businesses such as margin financing and financial assets held under resale agreements (mainly refer to security transaction with repurchase agreement and stock-pledged repo).

Fixed income financial assets include bank balances, clearing settlement funds, loan investment and bonds. Credit risk mainly includes the risk caused by its counterparties and securities issuer's default risk.

The counterparties of derivatives trading the Group engaged in were large and mid-sized financial corporations in Mainland China with restricted line of credit. Repurchase agreements could cause credit risk, but those agreements are mainly pledged government bonds and the transactions' settlement is conducted by exchanges, credit risk is therefore considered to be low. Therefore, the credit risk exposure arising from interest rate swaps is also insignificant.

In terms of the financing business, the credit risk exposure of margin financing and securities lending includes liabilities arising from purchasing securities by borrowings and selling the borrowed securities. The major credit risks of repurchase agreement and stock-pledged repo are derived from the default risk of counterparties due to their failure to repay the principal and interest of debts when due. The guarantees provided are sufficient and the credit risk of financing business is managed at an acceptable level.

44. FINANCIAL RISK MANAGEMENT – *continued*

44.3 Market Risk

Market risks refer to the financial loss risk caused by the unfavourable volatility of the fair values or future cash flows of the financial instruments, which are subjected to interest rate risk, exchange risk and other price risk.

The management of the Group determines the policy for the maximum market exposure the Group is willing to assume, the measurement and monitoring of such exposure are determined based on the risk preference, capital position, risk tolerance, and size of business of the Group. The Group develops relevant investment size limits and risk limits based on the risk exposure and disaggregates them into different investment departments, while manages market risks through the combination of investment transaction control, Value at Risk (VaR), sensitivity analysis, stress testing, risk assessment and monitoring of profit and loss, concentration and liquidity. The risk management department of the Group (“Risk Management Department”), which is independent from business departments, performs comprehensive assessment, monitoring and management on the overall market risk of the Group, and reports the assessment and monitoring results to each business department, the Group’s management and the risk management committee. When concretely implementing the market risk management process, the front desk serves as the first line management directly responsible for market risks, which dynamically manages the market risks resulted from the portion of positions held and actively takes measures to reduce risk exposure or performs risk hedging when the risk exposure is high; the Risk Management Department continuously and directly communicate risk information with teams of business departments to discuss risk status and extreme loss scenarios. Meanwhile, market risk conditions and their changes of the Group as a whole and each business department are timely reported to the Group’s management through regular risk reporting.

The Risk Management Department uses a series of quantitative methods to estimate possible losses resulted from market risks, including possible losses arising from normal market fluctuations and extreme market movements. The Risk Management Department measures possible short-term losses from normal fluctuations mainly by means of VaR and sensitivity analysis; while possible losses in extreme case are estimated through stress testing.

44. FINANCIAL RISK MANAGEMENT – *continued*44.3 Market Risk – *continued***Interest rate risk**

Interest rate risk is the risk of fluctuation in the fair value or future cash flows arising from adverse movements in interest rates. The Group's interest-bearing assets include bank deposits, clearing settlement funds, refundable deposits, and debenture investments. Fixed-income investments of the Group are mainly central bank bills, government bonds, medium-term notes, high-quality short-term papers, corporate bonds, treasury bond futures and interest rate swaps. There has been no changes in the interest rate risk management policies since 31 December 2014.

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for interest-bearing assets and liabilities. The analysis is prepared assuming interest-bearing assets and liabilities outstanding at the end of the period were outstanding for the whole period. When reporting to the management on the interest rate risk, a 100 basis points increase or decrease in the relevant interest rates will be adopted for sensitivity analysis, assuming all other variables were held constant, which represents a reasonably possible change in interest rates. A positive number below indicates an increase in profit before income tax and other comprehensive income before income tax or vice versa.

44. FINANCIAL RISK MANAGEMENT – continued

44.3 Market Risk – continued

Currency risk

Currency risk refers to the unfavourable volatilities of the Group’s financial condition and cash flows due to the fluctuation of the foreign exchange rates. Except for overseas subsidiaries which hold financial assets that are denominated in foreign currencies different from the relevant Group entity’s functional currency, the Group only holds a small amount of foreign currency denominated investment. The management considers the foreign exchange rate risk of the Group is not material as the ratio of the Group’s foreign currency assets and liabilities is minimal.

Price risk

Price risk is primarily about the unfavourable changes of share price, financial derivative instruments prices and commodity price that cause financial loss during the Group’s on-balance and off-balance business. Quantitatively, price risk the Group facing is mainly the proportionate fluctuation in the Group’s profits due to the price fluctuation of the trading financial instrument and the proportionate fluctuation in the Group’s equity due to the price fluctuation of the available-for-sale financial instrument. Other than daily monitoring the investment position, trading and earnings indicators, the Group mainly uses VaR, risk sensitivity indicators, stress testing indicators calculated by Risk Management Department in daily risk monitoring.

Sensitivity analysis

The analysis below is performed to show the impact on profit before income tax and other comprehensive income before income tax due to change in the prices of equity securities, funds, derivatives and collective asset management schemes by 10% with all other variables held constant. A positive number below indicates an increase in profit before income tax and other comprehensive income before income tax or vice versa.

44. FINANCIAL RISK MANAGEMENT – *continued*

44.4 Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with financial liabilities due to shortages of capital or funds. During the normal course of business, the Group may face liquidity risk caused by macroeconomic policy change, market fluctuation, poor operations, credit downgrades, mismatch of assets and liabilities, low turnover rate of assets, early redemption of exchange-quoted bond repurchase product by customers, large underwriting on a firm commitment basis, significant proprietary trading position, or high ratio of long term investment. If the Group fail to address any liquidity risk by adjusting the asset structure, the consequences of such non-compliance with regulatory requirements on risk indicators could be costly. The regulatory body could penalise the Group by imposing restrictions on the Group's and business operation. In severe cases, the Group could lose one or more business qualifications, leading an adverse impact on the Group's and the Company's operation and reputation.

To address liquidity risk, the Group has set up a dynamic risk monitoring system with net asset as a core index according to relevant regulations. The Group generates sensitivity analysis periodically and stress test using the information system and the data processing system. The systems have been launched and in a long-term smooth operation. It could furnish liquidity risk with relevant quantitative analysis and develop a powerful guidance and support for operations and activities. The Risk Management Department under the Group is responsible for monitoring all kinds of business operation risks. The Group sets up the funds management department, which works together with the Risk Management Department to take actions such as credit lending or temporary investments, scenario analysis, stress test, monitoring liquidity coverage ratio and net stable funding ratio for controlling the overall liquidity risk. The decision of massive fund allocation and operation shall be made collectively by the asset allocation committee and the risk control committee. The Group use concentration control, trading limit control and monitoring the market liquidity of financial instruments held by Group to address the liquidity risk of financial instruments. In order to meet the regulatory requirements, the Group has set up a multi-level, omni-directional and information-based management system to monitor and control the overall liquidity risk.

As at 30 June 2015, cash and bank deposits held by the Group amounting to RMB205.21 billion (31 December 2014: RMB67.67 billion) and financial assets such as monetary funds, government bonds and short-term financing bills amounting to RMB21.88 billion (31 December 2014: RMB5.00 billion), providing a strong capability of quick liquidation to meet foreseeable financing commitments or clients' withdrawal demands on maturity. Therefore, the Group considers the exposure to liquidity risk as insignificant.

45. FAIR VALUE OF FINANCIAL INSTRUMENTS

For financial reporting purposes, fair value measurements are categorised in to Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1: Inputs are quoted prices (unadjusted) in active market for identical assets or liabilities than the entity can access at the measurement date;
- Level 2: Inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly;
- Level 3: Inputs are unobservable inputs for the asset or liability.

Fair value of the financial assets and financial liabilities that are not measured on a recurring basis

The fair value of financial assets and financial liabilities not measured at fair value on a recurring basis is estimated using discounted cash flow method.

The carrying amounts of the financial assets and financial liabilities not measured at fair value on a recurring basis approximate their fair values as at 31 December 2014 and 30 June 2015.

45. FAIR VALUE OF FINANCIAL INSTRUMENTS – *continued***Fair value of the financial assets and financial liabilities that are measured at fair value on a recurring basis**
